Performance Without Compromise™

2019 Productivity Solutions

www.ergonomic-products.com
“Improvement usually means doing something that we have never done before.”

- Shigeo Shingo

Please note: We continually strive to improve our products and provide you with the most advanced dental equipment solutions possible. As a result of this pursuit of excellence, our current product line may differ from some of the photos presented here.

Our team of dedicated Practice Liaisons are happy to answer questions on current pricing, new products or features, and volume discounts where available. We look forward to speaking with you!

CONTENTS
Soon after starting my own practice, I began experiencing significant physical symptoms of repetitive stress injuries (carpal tunnel syndrome and others). After consulting with my physician, I was left with two unacceptable options: stop practicing dentistry, or undergo surgery.

Having studied LEAN manufacturing, I knew that many of the motions I performed were waste – unnecessary for accomplishing a physical transformation within the patient’s mouth. To get a better idea of the extent of this waste, I decided to film myself.

We recorded over 200 hours of footage. Reviewing the first 100 hours, I couldn’t help but laugh; the motions weren’t that dissimilar from a very busy switch-board operator. As I continued to watch, however, I grew much less amused. I realized I had been damaging my body – almost to the point of disregard – for the past 15 years. This needed to change; not just for me, but for every dentist in the country.

I established a research group which included Industrial Engineers, MIT Scientists and even the Ergonomist that NASA had hired to reconfigure the Space Shuttle control panel after the Challenger disaster. The conclusion became obvious to all: getting all of the items needed to do dentistry into a consolidated area, within equidistant reach of the doctor, assistant and the point-of-use (patient’s mouth), would begin to allow ergonomic positioning.

I realized then that I needed to create an entirely new way of delivery that would accomplish this. After dozens of attempts and design iterations, we invented the Universal Workstation. The patented Workstation design enables Over-The-Head delivery (“OTH”) which has since been recognized as the 4th and newest method of delivery by the ADA.

The Universal Workstation, and the principles of intelligent consolidation and waste elimination it represents, became the foundation from which we launched all improvements throughout the practice aimed at reducing stress and maximizing efficiency in our profession.

– David J. Ahearn, DDS
Fall River, Massachusetts
As a dentist you take on the roles of healer, artist, manufacturer, technician – and a host of other titles in the pursuit of your patients’ well being. You constantly refine your skills and are dedicated to the continuous improvement of your craft with one goal: to provide better dentistry to more patients. The equipment and systems you employ need to support those efforts, not hinder them.

At Ergonomic Products, we understand the importance of this. Why? Because our products and systems are developed by dentists, for dentists. This awareness is clearly seen in a variety of ways, all of which set us apart as uniquely qualified to meet the varied need of dental practitioners.

Why Choose Ergonomic Products?

Our Innovations are Solution-Driven

For the last 20 years, Dr. Ahearn has been integral in establishing some of the most successful dental practices in the country, and in each case, we have learned as much as we’ve shared. By helping thousands of the nation’s most productive dentists to design, equip and execute their unique vision for their practices we’ve been able to gather an incredible amount of feedback – from systems that work even better than expected, to issues that weren’t fully realized until practices encountered extreme growth.

We listen, we refine, we execute – creating tangible product solutions to problems that many companies aren’t even aware exist.

And then, of course, we test.

Dr. Ahearn is still – first and foremost – a wet-gloved, practicing dentist. He spends 20-30 hours each week at his two Southeastern Massachusetts offices.

This fact is the core strength of Ergonomic Products.

By constantly testing our own products in a real world, high-performance setting, we’re able to develop revisions and improvements in a fraction of the time that it takes larger organizations. This is our single greatest advantage and is why our products perform better than all others.

We don’t just design equipment. We use it.

A Smarter System Reduces Stress

Many of the systems we develop draw from LEAN manufacturing principles in which processes are simplified and standardized: modular supply delivery, visual restocking, streamlined room setups. This creates a predictable, comfortable and highly efficient work environment. With one standard set of operative supplies, one standard set of consumables, one standard block setup and a handful of standard instrument cassettes we’re able to design our delivery systems to accommodate 90% of your procedure profile.

Increased Productivity

One of the most prominent and immediate benefits to implementing Ergonomic Products equipment – and the design philosophies on which it’s created – is the increased production it brings. The ADA cites average doctor production at $432/hr. EP clients typically produce in the $1,000/hr+ range – some twice that. Call us... we’ll give you names.

These rates don’t require specialization in procedure or client-base. These are general practitioners performing standard treatment to a broad population. They simply get more done.

How? By aggressively consolidating core supplies to within equidistant reach of doctor, assistant and the point-of-use, our clients eliminate waste and streamline treatment. The non-value added activities of reaching, bending, twisting and turning disappear, shaving minutes from every procedure, which makes it possible to see more patients in less time.

Consolidation, by its very nature, also reduces the amount of space required for a highly efficient operator. This allows our clients to substantially increase capacity by installing, more treatment rooms in less space.

Improved Health

Over-the-Head delivery was originally developed to address the very real problem of repetitive stress injury. Increased productivity is simply a byproduct of the solutions Dr. Ahearn created to resolve this significant industry–issue. Extensive research and the review of procedure footage identified one clear fact: in order to reduce muscle–stress on both doctor and assistant – all instruments, supplies and the point-of-use had to be consolidated within a natural range of motion. This area is shown in blue in Figure 1.

The solution was the Universal Workstation. For the first time in the history of dental products, the patented design of the Universal Workstation allowed proper ergonomic positioning for both operators.

The multi-tiered design and highly-effective work surface of the our workstations enable a comprehensive presentation of materials. Core elements including the operative supply tub, consumable bin, and instrument cassettes accommodate even the most supply-intensive procedures such as implants and surgery. With everything immediately accessible, the risks of musculoskeletal disorders such as carpal tunnel syndrome and others are greatly reduced.

Over-the-Head delivery was originally developed to address the very real problem of repetitive stress injury. Increased productivity is simply a byproduct of the solutions Dr. Ahearn created to resolve this significant industry–issue. Extensive research and the review of procedure footage identified one clear fact: in order to reduce muscle–stress on both doctor and assistant – all instruments, supplies and the point-of-use had to be consolidated within a natural range of motion. This area is shown in blue in Figure 1.

The solution was the Universal Workstation. For the first time in the history of dental products, the patented design of the Universal Workstation allowed proper ergonomic positioning for both operators.

The multi-tiered design and highly-effective work surface of the our workstations enable a comprehensive presentation of materials. Core elements including the operative supply tub, consumable bin, and instrument cassettes accommodate even the most supply-intensive procedures such as implants and surgery. With everything immediately accessible, the risks of musculoskeletal disorders such as carpal tunnel syndrome and others are greatly reduced.
Workstations
Historically, practitioners have been limited to three essential methods of delivery:

- **Rear**, delivering at the 12 o’clock position
- **Over-the-Patient**, which delivers at 5 o’clock, and
- **Side**, delivering between 8 and 9 o’clock

While each of these methods may carry some benefit, all have significant disadvantages which may include a limited access to materials, the tendency to enforce poor ergonomic positioning, and a poor understanding of the patient’s perception.

Early in his career, Dr. David Ahearn recognized the inherent deficiencies of these existing methods and decided that “the way we’ve always done it,” was simply not an acceptable response. His research, experimentation and efforts lead the vanguard in the development of a fourth method of delivery, recognized by the ADA in 2004 as “Over-The-Head.”

The figures opposite break down the four distinct methods, highlighting the benefits and drawbacks of each.

---

**Over-The-Head**

Over-the-Head – combining streamlined presentation of supplies and instruments with an acute awareness of the patient’s perspective – is the newest and most effective method of dental delivery available to practitioners today. Similar to its counterparts (Side, Rear and Over-the-Patient), Over-the-Head’s name refers directly to its function in practice: where operator’s hand-pieces are located within mere inches of the point-of-use (the patient’s mouth), above and behind the patient at 1 o’clock.

However, hand-piece positioning alone was not enough to coin a new delivery method, as other cart based delivery methods can accomplish a similar result. The revolutionary concept that warranted an additional category of dental delivery came in Dr. Ahearn’s understanding that the delivery platform needed to be significantly more comprehensive than merely presenting hand-pieces – the workstation also needed to consolidate all the supplies and materials required to perform most standard treatments – and it needed to present them to both Doctor and Assistant within a reduced range of motion.

Over-the-Head delivery, via Ergonomic Products workstations, allows you to locate hand-pieces, assistant utilities, operative supplies, consumable materials, med-waste & sharps disposal, data access, curing lights, ultrasonic scalers, intraoral cameras, dental x-ray sensors and the entire assistant’s work surface – all within inches of the point-of-use.

The patented design of this multi-tiered delivery platform also provides several other noteworthy benefits unavailable through any other product on the market today.

Additional patented features include the Umbilical Quick Disconnect allows for all major utility connections (air, water, suction, power and USB) to be affixed to the backside of the junction box, which the Umbilical QD then plugs into with a simple turn of the wrist on 2 molex connectors. This has made installation and service much easier compared to other delivery methods.

The ergonomic and productive benefits of Over-the-Head delivery and the Universal Workstation are the core philosophies upon which we base all of our delivery units.
The next generation of ergonomic efficiency and enhanced productivity has arrived.

EP Workstations place all your clinical needs right at your fingertips. It is the most efficient and ergonomic solution to a fundamental problem: you can’t use what you can’t reach!

Developed by Dr. David Ahearn, “Over-the-Head” delivery allows all materials, supplies and instruments to be positioned within easy reach of both Dentist and Assistant. This reduces physical strain, and dramatically increases clinical efficiency by eliminating wasted motions.

The Stratus™ takes this simple but profound truth to the next level, creating a workspace of unprecedented capability.

With an expansive work-surface, unfettered accessibility, left/right convertibility and industry leading durability, the Stratus was designed for the true power-user: clinicians who understand that an exceptional delivery unit will vault production revenues to new heights.

See the following pages for Standard Features, Options & Alternative Configurations

The Stratus above is shown with options including electric handpiece integration and scalers. Materials, supplies and consumables shown in product images are not included. Ask your Practice Liaison for details.
Our high-performance delivery platforms offer a wide range of options to suit the way YOU deliver dentistry...

Electric Handpiece Integration - Bien Air MX2
We offer full electric integration of the Bien Air MX2 electric handpiece unit. The MX2 brushless micromotor, with adjustable LED light, is simply the best unit available. This revolution in engineering and control technology provides unparalleled balance and comfort, while giving constant power and perfect control of speed and torque. Control unit & single motor included. Handpieces sold separately.

Ultrasonic Scaler Integration
Our Workstations can incorporate a variety of scaler units. These units are fully integrated, consolidating multiple instrument control in a single foot-pedal.

Curing Light
THE CURE, TC-01, LED light is one of the smallest and most powerful corded lights, providing 1200 mW/cm² intensity. The LED has 4 diodes and allows for a 6-second cure.

The Cure TC-01 by Spring Health (included as standard on Stratus, as an option on other Workstations)

Additional Utility Upgrades Available
- 3rd Air Driven Handpiece Slow or High Speed (in 4, 5 or 6 hole options)
- 2nd Air/Water Syringe
- Dedicated Air Syringe
- 2nd / 3rd HVE

Not all upgrades are available for all Workstation configurations. See individual item listings for details.
Universal Workstation™ (Item D1A1)

The delivery platform that **redefined** the industry, is still the **gold standard** for productivity.

Dentistry is **easier, faster and more comfortable** with this **high-performance** solution.

---

**Standard Clinical Features**
- 1 High Speed Air HP
- 1 Low Speed Air HP
- 1 A/W Syringe
- 1 HVE
- 1 Saliva Ejector
- 10 Milled Hand-piece Holders
- Auxiliary Air/Water ports
- 2 Recessed Bur Detents
- 2-liter Self-contained Water
- 1 EP MegaTub w/Side Rack
- 1 EP Consumable Bin
- 1 EP Med-waste Bin

**Standard Configuration Features**
- Large Corian Work Surface
- Second Tier Corian shelf
- Pivoting Power Channel for full left/right convertibility
- Retractable Keyboard
- Single Function Foot-pedal
- Umbilical Quick Connect
- Auxiliary Power/USB Ports
- Powder Coated Steel Frame
- Adjustable Height Surface
- Waste Receptacle & Shelf

**Dimensions & Utilities**

**Utility Connections**
- A Quick Connect umbilical system is standard on the Universal to allow easy removal.

**Electrical Specifications**
- 120v AC, 60Hz, 6A
- Cat 5 or better Data Jack (workcenter)

**Air & Vacuum Specifications**
- Air: 3/8" Dental Style Female QD, 80 psi
- Vacuum: 1/2" Copper or PVC Pipe

**Plumbing Specifications**
- If using a plumbed dental line feed:
  - 1/2" Cold or Dedicated Dental supply line with straight 1/4 turn-stop and 3/8” compression

**Electric Handpiece Integration:**
- Bien Air MX2 - single motor
- Bien Air MX2 - dual motors

**Scalers:**
- Parkell Turbo Piezo Scaler
- or - Parkell Manual/AutoTune
- or - Parkell Turbo Sensor Scaler

**Curing Light:**
- The Cure TC-01 (Spring Health)

**Fiber Optics:**
- Fiber Optics Light Source & Power Pack

**Water Feed:**
- Plumbed Line & Bottle

**Additional Handpieces/Utilities:**
- 3rd Air Driven Handpiece Hose
- High Speed (5 or 6 hole)
- or - Slow Speed (4 hole)
- 2nd Air/Water Syringe
- 1 Dedicated Air Syringe
- 2nd/3rd High Volume Suction

**COLOR CHOICES**
- Corian surface available in standard EP Corian color choices.

**UPGRADES**
- see page 15 for details

**Configuration Options**

**Manhattan Style (Item D1A1)**
- When used with the Manhattan Cabinet System, the second tier work surface of the Universal is relocated to pull-down shelving, as shown on opposite page. (Configuration will be noted at time of order.)

**Assistant Cart (Item D1A2)**
- For Over-the-patient and Side Delivery, an “Assistant” version of the workstation is available without handpieces.

**Utility Cart (Item D1A4)**
- Two-Tiered, mobile work surface (no handpieces, power channel, or air/water utilities)
Consolidated supplies, enhanced ergonomics and a broad range of custom options make the Horizon an exceptional delivery platform at an attractive price.

**SIGNIFICANT DESIGN UPDATES**

With its recent design upgrade, the Horizon now offers many of the double-tier benefits of our top-of-the-line Over-the-Head Workstations.

- Materials are presented in a forward position for enhanced accessibility, while leaving the expanded Corian work-surface clear of obstructions.
- Our low-profile power channel allows closer positioning to the patient for more comfortable and efficient delivery.
- The pivoting channel, and dual-side composite racks allows for instant Left/Right convertibility.
- "O" frame base offers improved stability and better hose management.
- A broad range of custom options allow you to tailor this high-production instrument to suit your needs and taste.

**COLOR CHOICES**

- Corian surface available in standard EP Corian color choices.

**UPGRADES - see page 15 for details**

- Scalers:
  - or - Parkell Turbo Piezo Scaler
  - or - Parkell Manual/AutoTune
  - or - Parkell Turbo Sensor Scaler
- Curing Light
  - The Cure TC-01 (Spring Health)
- Utilities Connection:
  - Umbilical Quick Connect

**CONFIGURATION OPTIONS**

- Assistant Cart (Item D1B2)
  - An "Assistant" version of the workstation is available without handpieces.
- Utility Cart (Item D1B4)
  - Mobile work surface (no handpieces, power channel, or air/water utilities)

**Dimensions & Utilities**

- Standard utilities connection for the Horizon is via an umbilical with 4" pigtailed lines for "snoot mount" connection to the headwall. However, a Quick Disconnect function is available.
- Pre-wiring the power channel to receive an integrated Scaler (see below) is also an option.

**Electrical Specifications**

- 120v AC, 60Hz, 8A
- Cat 5 or better Data Jack (workcenter)

- Air / Vacuum Specifications

- Air: 3/8" Dental Style Female QD, 80 psi
- Vacuum: 1/2" Copper or PVC Pipe

- Plumbing Specifications

- If using a plumbed dental line feed:
  - 1/2" Cold or Dedicated Dental supply line with straight 1/4 turn-stop and 3/8" compression

**Standard Clinical Features**

- 1 High Speed Air
- 1 Low Speed Air
- 1 A/W Syringe
- 1 HVE
- 1 Saliva Ejector
- 2 recessed Bur Detents
- 10 Milled Hand-piece Holders
- 2-tier Self-contained Water
- 1 EP UltraTub
- 1 EP Consumable Bin
- 1 EP Med-waste/Sharps Bin

**Standard Configuration Features**

- Large Corian Work Surface
- Adjustable Height Surface
- Pivoting Power Channel for full left/right convertibility
- Single Function Foot-pedal
- Powder-coated Steel Frame

**Additional Handpieces/Utilities**

- 3rd Air Driven Handpiece Hose
- High Speed (5 or 6 hole)
- - or - Slow Speed (4 hole)
- 2nd Air/Water Syringe
- 1 Dedicated Air Syringe
- 2nd/3rd High Volume Suction
- Water Feed:
  - Plumb Line & Bottle

**Fiber Optics**

- Fiber Optics Light Source & Power Pack

**Other Options/Upgrades**

- Waste Receptacle & Shelf
- Slide-out Keyboard Shelf
- Auxiliary Air/Water Ports
- Auxiliary Power/USB Ports
Terra Workstation™ (Item D1D1)

Simple, effective and economical performance on a moderate budget.

The Terra Workstation eliminates our standard second tier and presents all materials, supplies, and consumables on single, integrated frame. This places materials a little further away than on our two-tiered workstations, but still solidly within a comfortable range of motion necessary to ergonomic efficiency.

Explode your productivity... not your start-up costs.

With additional streamlining to the power-channel, the Terra provides many of the ergonomic and production benefits found throughout the Ergonomic Products line - but does so at a very attractive price.

The Terra is an excellent solution for doctors launching their first practice.

Standard Clinical Features
- 1 High Speed Air
- 1 Low Speed Air
- 1 A/W Syringe
- 1 HVE
- 1 Saliva Ejector
- 8 Millied Hand-piece Holders
- 2-liter Self-contained Water
- 1 EP UltraTub
- 1 EP Consumable Bin
- 1 EP Med-waste/Sharps Bin

Standard Configuration Features
- Corian Work Surface
- Adjustable Height Surface
- Pivoting Power Channel for full left/right convertibility
- Single Function Foot-pedal
- Powder Coated Steel Frame
- 8 Milled Hand-piece Holders
- 2-liter Self-contained Water
- 1 EP UltraTub
- 1 EP Consumable Bin
- 1 EP Med-waste/Sharps Bin

Standard utilities connection for the Terra is via an umbilical with 4’ pigtailed lines for “snoot mount” connection to the headwall. However, a Quick Disconnect function is available.

Dimensions & Utilities

Electrical Specifications
- 120v AC, 60HZ, 8A
- Cat 5 or better Data Jack (workcenter)

Air / Vacuum Specifications
- Air: 3/8” Dental Style Female QD, 80 psi
- Vacuum: 1/2” Copper or PVC Pipe

Plumbing Specifications
- Self-contained bottle only

COLOR CHOICES
- Corian surface available in White only

UPGRADES - see page 15 for details

Curing Light
- The Cure TC-01 (Spring Health)

Additional Handpieces/Utilities:
- 2nd High Volume Suction

Fiber Optics:
- Fiber Optics Light Source & Power Pack

Utilities Connection:
- Umbilical Quick Connect

Other Options/Upgrades:
- Waste Receptacle & Shelf
- 2 Recessed Bur Detents

CONFIGURATION OPTIONS

Assistant Cart (Item D1D2)
- An “Assistant” version of the workstation is available without handpieces.

Utility Cart (Item D1D4)
- Mobile work surface (no handpieces, power channel, or air/water utilities)
Small Room Solutions Workstation™ (Item D1C1)

Because a Small Operatory is better than No Operatory.

Sometimes, “small” is all you’ve got to work with – whether it’s a converted doctor’s office, a reclaimed store-room, or even a closet! However, you don’t have to let a space restriction prevent you from achieving your capacity goals!

Whatever your circumstance, if you need to create a high-performance operatory in a tiny space, the Ergonomic Products’ SRS Workstation is the pinnacle of compact delivery and support systems.

With the smallest footprint of any free-standing delivery system on the market, the Compact Cart provides the exceptional performance of a standard EP Workstation in a fraction of space.

**Standard Clinical Features**
- 1 High Speed Air
- 1 Low Speed Air
- 1 A/W Syringe
- 1 HVE
- 1 Saliva Ejector
- 8 Milled Hand-piece Holders
- 1 Recessed Bur Detent
- 2-liter Self-contained Water
- 1 EP Consumable Bin
- 1 Med-waste/Sharps Bin

**Standard Configuration Features**
- Large Corian work surface
- Stable 5-wheel base
- Adjustable height surface

**Dimensions & Utilities**

**Upgrades - see page 15 for details**

**Scalers:**
- Parkell Turbo Piezo Scaler
- or - Parkell Manual/AutoTune
- or - Parkell Turbo Sensor Scaler

**Curing Light**
- The Cure TC-01 (Spring Health)

**Additional Handpieces/Utilities:**
- 2nd Air/Water Syringe
- 1 Dedicated Air Syringe
- 2nd High Volume Suction

**Fiber Optics:**
- Fiber Optics Light Source & Power Pack

**Other Options/Upgrades:**
- Auxiliary Power/USB Ports

**COLOR CHOICES**
- Corian surface available in standard EP Corian color choices.

**CONFIGURATION OPTIONS**

**Assistant Cart (Item D1C2)**
- An “Assistant” version of the workstation is available without handpieces.

**Utility Cart (Item D1C4)**
- Mobile work surface (no handpieces, power channel, or air/water utilities)

**Electrical Specifications**
- 120v AC, 50/60Hz, 6A
- Cat 5 or better Data Jack (workcenter)

**Air / Vacuum Specifications**
- Air: 3/8" Dental Style Female QD, 80 psi
- Vacuum: 1/2" Copper or PVC Pipe

**Plumbing Specifications**
- Self-contained bottle only

Standard utilities connection for the SRS is via an umbilical with 4' pigtailed lines for “snoot mount” connection to the headwall. However, a Quick Disconnect function is available.

**Assistant Cart** (Item D1C2)
- An “Assistant” version of the workstation is available without handpieces.

**Utility Cart (Item D1C4)**
- Mobile work surface (no handpieces, power channel, or air/water utilities)

**Because a Small Operatory is better than No Operatory.**

- An “Assistant” version of the workstation is available without handpieces.

**Utility Cart (Item D1C4)**
- Mobile work surface (no handpieces, power channel, or air/water utilities)
A compact InWall all-in-one instrument that provides hygiene the same high-level production capabilities found in all our Workstations.

Standard Features

- 3-point Swivel for 2-hand/4-hand convertibility
- 1 High Speed Air
- 1 Low Speed Air
- 1 A/W Syringe
- 1 HVE
- 1 Saliva Ejector
- Parkell Manual Scaler
  - or - Parkell Turbo Sensor Scaler
- 1 EP Consumable Bin
- 1 EP Med-waste Bin
- 8 Milled Hand-piece Holders
- 2-Liter Self-contained water supply
- Auxiliary Air/Water Ports
- Bib/Glove/Product storage (D2B)

CONFIGURATION OPTIONS

Unit may be purchased with or without Upper Cabinet:
- Lower Unit - Workstation ......................... D2A1
- Upper Unit - Cabinet ................................ D2A4

COLOR CHOICES

Corian Work Surface:
- Available in standard EP Corian color choices.

Cabinet Color/Finish Selection:
- Cabinet available in standard EP color choices.
- - or - Upgrade to woodgrain finish. (Standard EP selections)

UPGRADES - see page 15 for details

Scalers:
- Parkell Turbo Piezo Scaler

Curing Light
- Spring Health Cure 1 Light

Water Feed:
- Plumbed Line & Bottle

Additional Handpieces/Utilities:
- 3rd Air Driven Handpiece Hose
- High Speed (5 or 6 hole)
- - or - Slow Speed (4 hole)
- 2nd Air/Water Syringe
- 1 Dedicated Air Syringe
- 2nd High Volume Suction

Fiber Optics:
- Fiber Optics Light Source & Power Pack

Other Options/Upgrades:
- Auxiliary Power/USB Ports

In most cases, operatories should be designed to accommodate any procedure. However, there are times when space requirements aren’t conducive to this.

The 32” Hygiene InWall is primarily intended for dedicated solo-operator rooms as narrow as 7” wide. The swivel arm and InWall design of the unit allows for a more compact floor plan while providing exceptional productivity.
Universal Headwall™ (Items C1B1, M3C1 & C2B1)

The Universal Headwall is built to maximize utility & efficiency of our operatory designs and industry-leading delivery systems.

Standard Features
C1B1 - Computer Storage Cabinet
- 4.4 cubic feet for storage, with access doors on each side
- Full extension Slide-out Shelf for CPU (right side of cabinet)
- Adjustable Shelves for bulk storage (left side)
- Monitor Mounting Bracket (monitor not included)

M3C1 - Slat Wall
- Nearly 5 sq ft of Slat Wall to display and store accessory materials.
- Corian Top-cap included

C2B1 - Universal Work Center
- 4 sq ft of solid Corian work surface
- Retractable counter extensions provide an additional 2 sq ft of work surface
- 2 deep Storage Drawers
- Quick Connect Umbilical port (standard)
- Utility Access Panel

Standard Features
C2B1 - Universal Work Center
- 4 sq ft of solid Corian work surface
- Retractable counter extensions provide an additional 2 sq ft of work surface
- 2 deep Storage Drawers
- Quick Connect Umbilical port (standard)
- Utility Access Panel

Options:
- Optional Sink Upgrade for C2B1 Work Center - Item #315-015
  Sink option includes stainless steel sink & chrome faucet. Supplied with Corian backsplash (if not using Slat Wall).
- Med-waste bracket
- Remote control holder
- Sanitation Wipes holder
- Pad & Pen holder
- "Goodie Bag" brackets
- Printer Shelf
- Monitor Bracket

Ergonomic Products
Performance Without Compromise™

Dimensions & Utilities

Ideal Room Location

The Universal Headwall is a highly efficient utility, storage and workcenter. It is most effective when used in a dual / head-entry format.

In conjunction with the Universal Workstation, this creates an ideal ergonomic production zone that is both highly efficient - and out of the patient’s line-of-site on entry to the operatory.

Electrical Specifications
- 120v AC, 60HZ, 8A
- Cat 5 (or better) Data Jack

Air / Vacuum Specifications
- Air: 3/8" Dental Style Female QD, 80 psi
- Vacuum: 1/2" Copper or PVC Pipe

Plumbing Specifications
- Dental Line feed:
  - 1/2" Cold or Dedicated Dental supply line with straight 1/4 turn-stop and 3/8" compression
- Sink feed:
  - 1/2" Hot & Cold domestic supply lines with straight 1/4 turn-stop and 3/8" compression
  - 1-1/2" DWV with P-Trap

CONFIGURATION and UPGRADE CHOICES

Cabinet Color/Finish Selection:
- Cabinet available in standard EP color choices.
- or - Upgrade to woodgrain finish. (Standard EP selections)

Corian Work Surface:
- Corian available in standard EP Corian color choices.

Utility Configuration
- Standard Umbilical Quick Connect
- OR - Snoot Mount
- OR - No utility opening (solid face)

Optional Sink Upgrade for C2B1 Work Center - Item #315-015
Sink option includes stainless steel sink & chrome faucet. Supplied with Corian backsplash (if not using Slat Wall).
Manhattan Cabinet System™ (Items C1C1, M3D1 & C2C1)

Present patients with a clean, welcoming look upon entry to the operatory – without sacrificing productivity and efficiency.

Standard Features

C1C1 - Manhattan Upper Cabinet
- Pull-down Shelf with Corian work surface and Keyboard Slide acts as a second tier for the Universal Work Station
- Second hydraulic pull-down
- Monitor Mounting Bracket (monitor not included)

M3D1 - Slat Wall
- Over 11 sq ft of Slat Wall to display and store accessory materials.

C2C1 - Manhattan Lower Cabinet
- Over 7 sq ft of solid Corian work surface
- 4 Storage Drawers
- Quick Connect Umbilical Port (standard)
- Utility Access Panel

Configuration, Upgrade and Color Choices

Pull-down Shelving Configuration and Options:
- Corian Pull-down on RIGHT / Basic Pull-down on left
- or - Corian Pull-down on LEFT / Basic Pull-down on right
- or - Corian Pull-downs on both sides, Upgrade, Item #160-120.
  (This option is needed for complete Left/Right convertibility.)

Cabinet Color/Finish Selection:
- Cabinet available in standard EP color choices.
- OR - Upgrade to woodgrain finish, (Standard EP selections)

Corian Work Surface:
- Corian available in standard EP Corian color choices.

Utility Configuration
- Standard Umbilical Quick Connect
- OR - Standard Utility Connection

Optional Sink Upgrade for C2C1 Lower Cabinet
Sink option includes stainless steel sink & chrome faucet.

The Manhattan Cabinet System is most effective when used in a single-entry / toe-entry operatory, in conjunction with a single tier Universal Workstation.

Used this way, much of the supplies and materials associated with treatment are removed from the patient's view on entry.
If ordered with a second Corian Pull-down shelf, the unit may be quickly left/right converted.

Ideal Room Location

Dimensions & Utilities

Electrical Specifications
120v AC, 60HZ, 8A
Cat 5 (or better) Data Jack

Air / Vacuum Specifications
Air: 3/8" Dental Style Female QD, 80 psi
Vacuum: 1/2" Copper or PVC Pipe

Plumbing Specifications
Dental Line feed:
- 1/2” Cold or Dedicated Dental supply line with straight 1/4 turn-stop and 3/8” compression
- 1-1/2” DWV with P-Trap

If C2C1 is purchased with Sink -
Sink feed:
- 1/2” Hot & Cold domestic supply lines with straight 1/4 turn-stop and 3/8” compression

shown with options. Monitor & accessories not included.

The Manhattan Cabinet System is shown with a range of Slat Wall accessories. Ergonomic Products offers the items below, and others are available from a variety of resellers.
- Med-waste bracket
- Remote control holder
- Sanitation Wipes holder
- Pad & Pen holder
- "Goodie Bag" brackets
- Printer Shelf
- Monitor Bracket

Dimensions & U
16” InWall™ Comfort Station (Item N1A1)

**A touch of comfort** to enhance your **patients’ experience**, without having to leave the operatory.

**Standard Features**
- Large, hinged mirror covers InWall storage
- Impact resistant, seamless face-frame
- Chrome faucet
- Brushed stainless under-mount sink
- Beveled Corian counter
- Corian backsplash
- Utility access panel
- Recessed paper towel and cup dispenser behind mirror

**COLOR CHOICES**

**Corian Surface:**
- Corian surface available in standard EP Corian color choices.

**Cabinet Color Selections:**
- Faceframe and interiors available in standard color choices.
- **OR** - Upgrade to woodgrain finish interiors with matching faceframe paint. (Standard EP Woodgrain finishes)

**Dimensions & Utilities**

The primary location for 16” Comfort Station units is in the operatory, on the right-hand side of the headwall, roughly 3’ from the toe-wall. However, their compact size make these units very versatile allowing placement in different locations within the operatory (plumbing dependent).

**Plumbing Specifications**
- Unit is supplied with Delta 570 Single Lever Faucet and 1-1/4” 90° Tail piece.
- Plumber to provide:
  - 1/2” Hot & Cold domestic supply lines with straight 1/4 turn-stop and 3/8” compression
  - 1-1/2” DWV with P-Trap as shown

Ideal Room Location
16" InWall™ Storage (Item N1B1)

Efficient InWall™ storage to add functional, attractive utility to the smallest spaces.

Standard Features
- Impact resistant, seamless face-frame
- Bulk storage specifically designed to hold standard glove boxes

Accessories/Options
- Faceframe and interiors available in standard EP color choices.
- OR - Upgrade to woodgrain finish interiors with matching faceframe paint. (Standard EP Woodgrain finishes)

ACCESSORIES & CONFIGURATION UPGRADES
- Paper Towel Holder
- OR - Patient Chart Holder
- Flip-up writing surface
- OR - Med-waste flip-out

COLOR CHOICES
- Faceframe and interiors available in standard EP color choices.
- OR - Upgrade to woodgrain finish interiors with matching faceframe paint. (Standard EP Woodgrain finishes)

The primary location for 16" InWall Storage units is in the operatory, on the right-hand side of the headwall. Placing the centerline of the unit directly in line with the head of the patient chair typically provides the assistant with the greatest access. However, placement is somewhat flexible – confer with your contractor or architect. Additionally, these units are very versatile and can be extremely useful in many areas of the practice, including multiple locations within a single operatory.
24” InWall™ Storage (Item N2B1)

Expand bulk storage space & accessibility to frequently used items in the operatory – **without impacting the footprint!**

**Standard Features**
- Impact resistant, seamless face-frame
- Bulk storage specifically designed to hold standard glove boxes

**Accessories/Options**
- Faceframe and interiors available in standard EP color choices.
- **OR** - Upgrade to woodgrain finish interiors with matching faceframe paint. (Standard EP Woodgrain finishes)

**Accessories & Configuration Upgrades**
- **Accessories:**
  - Paper Towel Holder
  - Patient Chart Holder
- **Configuration Upgrades:**
  - Flip-up writing surface
  - **OR** - Med-waste flip-out

**Ideal Room Location**

The primary location for 24” InWall Storage units is in the operatory, on the right-hand side of the headwall. Placing the centerline of the unit directly in line with the head of the patient chair typically provides the assistant with the greatest access. However, placement is somewhat flexible – confer with your contractor or architect.

Additionally, these units are very versatile and can be extremely useful in many areas of the practice, including multiple locations within a single operatory.
Big presentation capabilities in a compact package – a true Small Room Solution!

Standard Features

- Extremely compact case presentation platform ideal for small rooms
- Articulating Media Arm and Bracket (monitor not included)
- Glove & bib storage shelves
- Flip up writing surface
- Additional built-in storage (behind writing flip-up)

COLOR CHOICES

Cabinet Color Selections:
- Faceframe and interiors available in standard color choices.
- OR - Upgrade to woodgrain finish interiors with matching faceframe paint. (Standard EP Woodgrain finishes)

Monitor and accessories not included

Electrical Specifications

120v Duplex Outlet (all-in-one computer or networked monitor)
Cat 5 (or better) Data Jack

Outlet box and data jack are to be mounted inside cabinet after installation.

Electrical and data pigtails should be long enough to easily feed through side of cabinet during installation (12”).
Do not attach wiring to studs closer than 12” from holes to allow excess wire to be pushed back in the stud bay.

Ideal Room Location

Left-Mounted Media Arm, best suited for right-handed clinician rooms. Ideal for smaller rooms, including dedicated hygiene, where space is at a premium.

To maximize monitor arm geometry, the centerline of the 24” Media should be placed roughly 6’ from the headwall (as shown). Positioning the unit within the dimensional tolerance indicated will allow maximum effect for patient presentation and treatment planning.
Accommodate the **patient experience** while gaining useful storage/work space with this sleek, space-efficient InWall™.

**Standard Features**
- Corian counter-top
- Additional product storage behind mirror
- Open glove & bib storage
- Chrome faucet
- Brushed stainless sink
- Utility access panel

**Optional Features/Configurations**
- Available with sink oriented to the left or right (or without sink)
- Extended counter available (either orientation)

---

**CONFIGURATION**

**Standard Product Orientation:**
- Sink oriented left
- OR - Sink oriented right
- OR - NO SINK

**Extended Counter Variation (Item N3A2):**
- Extended counter, left
- OR - Extended counter, right
  (sink must orient opposite counter)

---

**COLOR CHOICES**

**Corian Surface:**
- Corian surface available in standard EP Corian color choices.

**Cabinet Color Selections:**
- Faceframe and interiors available in standard color choices.
- OR - Upgrade to woodgrain finish interiors with matching faceframe paint. (Standard EP Woodgrain finishes)

---

**Dimensions & Utilities**

**Ideal Room Location**

For Right Handed Doctor rooms, the 32” InWall Comfort is best used with a left-oriented sink, placed on centerline of the operatory, though some lee-way is fine. If the unit needs to be shifted, most doctor’s will place the unit closer to the toe, rather than head.

The centerline of the cabinet remains the same, if purchased with the extended shelf.

For alternate room layouts or equipment configurations, position unit so that right side of cabinet lines up with head of chair when reclined.

---

**Plumbing Specifications**

Unit is supplied with Delta 570 Single Lever Faucet and 1-1/4” 90˚ Tail-piece.

Plumber to provide:
- 1/2” Hot & Cold domestic supply lines with straight 1/4 turn-stop and 3/8” compression
- 1-1/2” DWV with P-Trap as shown
Increase the capabilities of your operatories... not their square footage.

Standard Features
- Articulating Media Arm w/ monitor bracket
- Extended Corian counter-top
- Recessed paper towel and cup dispenser behind large, hinged mirror
- Additional product storage behind mirror
- Open glove & bib storage
- Chrome faucet
- Brushed stainless sink
- CPU compartment
- Utility access panel

Optional Features/Configurations
- Available with sink oriented to the left or right (or without sink)
- Under-counter keyboard swivel (shown)
- USB panel

Electrical Specifications
- 120v Duplex Outlet (computer and monitor)
- Cat 5 (or better) Data Jack

Plumbing Specifications
- Unit is supplied with Delta 570 Single Lever Faucet and 1-1/4" 90° Tail-piece.
- Plumber to provide:
  - 1/2" Hot & Cold domestic supply lines with straight 1/4 turn-stop and 3/8" compression
  - 1-1/2" DWV with P-Trap as shown

COLOR CHOICES
- Monitor not included

Dimensions & Utilities

Ideal Room Location

Left Sink with Right Counter Extension, ideally for Right Handed Doctor rooms.

To maximize monitor arm geometry, the 32" Comfort Media should be placed roughly 5' 6" from the headwall (as shown). Dimensional tolerance of 6" will allow maximum effect for patient presentation and treatment planning.

For alternate room layouts or equipment configurations, position unit so that right side of cabinet lines up with head of chair when reclined.
Double your storage space... while improving accessibility, visibility and safety.

Standard Features

- Hydraulic pull-down shelving provides easy access to materials.
- Maximizes use of vertical storage space without sacrificing safety.
- Open shelving allows visual inventory - know at a glance, what you have and where it is.
- Partition storage under unit allows for a quick and customizable arrangement of materials.
- Hygiene version with doors available (see C1A2 below)

RESUPPLY CONFIGURATION

Cabinet Color Selections:
- Available in standard color choices.
- OR - Upgrade to woodgrain finish. (Standard EP Woodgrain finishes)

Cabinet Doors:
- No Doors (this is the standard configuration).
- OR - Include doors

HYGIENE CONFIGURATION (Item C1A2)

While open storage is recommended in central resupply areas, it is less desired in patient-oriented spaces. To address this, we offer the Hygiene Resupply. Intended for use in Hygiene rooms, this version eliminates the open, partitioned under-storage and is only sold with doors.

Cabinet Color Selections:
- Available in standard color choices.
- OR - Upgrade to woodgrain finish. (Standard EP Woodgrain finishes)
RapidCart Systems
RapidCart™ Systems

Don’t duplicate expensive equipment – **mobilize it!**

RapidCarts allow instantaneous deployment and set up of less frequently used treatment instruments such as those in endodontics, surgery and advanced diagnosis. Distributing technology from room to room – rather than targeting treatment to individual rooms – creates a more flexible and responsive clinical environment and is one of Ergonomic Products core efficiency principles:

**Any Procedure, Any Room, Any Time.**

Ergonomic Products’ line of RapidCarts have been designed specifically for the Practice environment with a narrow profile for ease of movement in operatories - but with large casters for added stability. The standard product work surface is durable Power Top plastic/ fiberboard laminate. Corian upgrades are also available for a more refined finish.

**COLOR OPTIONS - ALL CARTS**

Work Surface:
- White powder-coat (base product)
- or - White Corian Upgrade
- or - EP Standard Color Corian Upgrade

Cabinet Color Selections:
- Exterior finish available in standard EP colors
- or - upgrade to woodgrain finish
  (Standard EP Woodgrain finishes)

**Mobile Storage Cart™ (Item R1C1)**

**Standard Features**
- Anodized aluminum corner-framing
- 4 milled hand-piece holders
- High-impact plastic casters
- Precision bearing drawer Slides
- Soft-touch drawer close for secure transport

**Height, width and depth dimensions above are standard for the three carts shown here.**

See opposite page for shelving and utility configurations.

**Doctor Specialty RapidCart™ (Item R1A1)**

**Standard Features**
- Wiring apertures on work surface, with stainless steel cover plates
- 5 outlet power strip mounted on rear
- Velcro cord management loop
- 2 Side aperture wiring openings
- Adjustable shelf
- Milled detent on work surface for small items
- Two deep drawers
- Soft-touch drawer close for secure transport

**Suggested Accessories (see pages 70 & 73)**
- 1 Zirc Tub for shelf (item M1E1 or M1E2)
- 2 Lewis Bins, in drawers (item M1D1)
- Foot Pedal Holder (2 sizes)

**Rapid Deployment Cart™ (Item R1B1)**

**Standard Features**
- 2 Side aperture wiring openings
- Fixed slide brackets to receive Standard Zirc or other supply tubs
- Two deep drawers
- Soft-touch drawer close for secure transport

**Suggested Accessories (see page 70)**
- Standard Zirc Tub (item M1E2)
- 2 Lewis Bins, in drawers (item M1D1)
A truly exceptional lighting solution addresses both clinical needs and patient comfort – which is why Ergonomic Products has developed the TBLco brand (“The Best Light”), and bring you the Aurora LS.

The Aurora LS is the industry’s only fully integrated light incorporating full room, spot, and intraoral lighting with patient media. This unit condenses all illumination needs into a single, elegant fixture.

The Aurora’s dimmable room strips cast light both up and to the sides for an even, reflected coverage – making patients more comfortable and reducing clinician eye-strain.

Using all LED lights, the Aurora LS is significantly more energy efficient than comparable products, generates less heat, and conforms to the most stringent state regulations.

Standard Features
- All LED lighting
- 7000-32000 lux intra-oral light
- Built-in touchless On/Off control
- Tune-able wave-length allows intra-oral use with a range of curable composites
- Continuous 360° light-arm rotation
- Dimmer-controlled, reflected general lighting for an improved patient experience
- 2 high-intensity task lights, with independent direction and focus adjustment
- Industry exclusive igus® cable management prevents cord binding and wear
- Adjustable VESA 100 monitor bracket

**Aurora LS™ (Item L1A1)**

All-in-one functionality that is brilliant, in every sense of the word.
Our intra-oral light head, on a simple, compact & reliable track for exceptional lighting at an affordable price.

The FastTrack LS™ is an extremely cost-effective track-light that provides high-quality features at a very attractive price.

Designed with industry-leading, tune-able wave-length LED output, the FastTrack LS provides enhanced visual acuity while reducing heat generation and lowering energy costs.

And our touch-less light controls make asepsis management as simple as a wave of the hand!

With its milled aluminum trolley, single-piece extrusion body, 360° arm-rotation and an advanced igus® cable management system, this light is built to out-perform – and out-last – the competition.

Standard Features

- All LED lighting
- 7000-32000 lux intra-oral light
- Built-in touchless On/Off control
- Tune-able wave-length allows intra-oral use with a range of curable composites
- 360° light-arm rotation
- Single-piece aluminum extrusion body
- Milled billet aluminum trolley
- Industry exclusive igus® cable management prevents cord binding and wear

Our intra-oral light head, on a simple, compact & reliable track for exceptional lighting at an affordable price.

The FastTrack is intended for center-line mounting in the operatory.

The layout above is represents a typical EP Workstation-equipped operatory. Headwall-to-Track distances may vary in other environments. If so, position light based on reclined patient-chair head-rest as indicated.
**3-Series™ Patient Chair**

Heat, Massage & Traverse for the best possible patient and clinician experience.

When your patients’ comfort is job one, why would you want anything less than the most comfortable, feature-rich chair on the market?

**CONFIGURATION**

Function:
- EP 390 - Heat, Massage & Traverse .............Item S1A1
- EP 370 - Traverse Only .................................Item S1A2
- EP 330 - Heat & Massage Only ....................Item S1A3
- EP 310 - No Heat, Massage or Traverse .........Item S1A4

**OPTIONS**

- Self-tensioning Arm Slings
- 2nd Chair Control Touchpad
- Foot Control Pedal

**COLOR CHOICES**

Upholstery:
- Upholstery is available in a range of solid, standard EP colors. Swatch-cards available.
- OR – Upgrade to a three-color upholstery scheme as shown below.

Swatch samples and custom colors are available. Please call for details.

**Dimensions, Features & Specifications**

Absolutely the most feature-rich chair on the market, the EP 390 was designed to consolidate the best-in-class features appearing over the past 3 decades.

With intense attention to the details of patient comfort and practitioner ease-of-use, the EP 390 will redefine your perspective on seating.

**Standard Features**
- Heated base
- Lower lumbar massage
- 10-1/4" Traverse length for perfect positioning
- Memory Foam support
- Rich UltraLeather® upholstery
- Hydraulic lift
- Audio inputs

**Electrical Specifications**
- 120v Duplex Outlet
- Audio line (if desired)

**Upholstery:**
- Available in a range of standard EP colors.
- Swatch-cards available.
- Upgrade to a three-color upholstery scheme as shown.

Swatch samples and custom colors are available. Please call for details.
Doctor/Hygiene Stool (Item S2A1)

Compliment the advanced ergonomics of our delivery solutions with equally advanced clinician seating.

The patented design of the RGP 400 line helps protect your most important asset - your health.

RGP 400-D
Doctor/Hygiene Stool (item S2A1)

COLOR CHOICES

RGP stools are available in any of our EP standard color selections to match or compliment the 3-Series Patient Chair. (Stools use a one-color scheme only.)

Swatch samples and custom colors (upgrade) are available. Please call for details.

CONFIGURATION

Arm Rests (Dr. Stool only):

- No arm rests (Standard)
- OR - Single or Dual arm rests in a variety of combinations. Call for details.

Assistant Stool (Item S2A2)

The 400-D stools promote postural changes that eliminate daily fatigue and pain, while improving productivity.

Standard Features (400-D line)

- Patented split backrest for lower lumbar support
- Contour Seat Cushion
- Built with standard cylinder height range (19.5”- 24.3” seat level)
- “Active Seating” responds to weight and position changes
- Rich UltraLeather® upholstery
- Single lever, multi-function control
- Assistant Stool includes adjustable foot-ring for added comfort and utility

The patented design of the RGP 400 line helps protect your most important asset - your health.

Unique to the 400 series is its hydraulic mechanism which allows the stool’s back and seat to "float", following one’s movement. This “Active Seating” is further enhanced by the adjustable heights of both the backrest and the stool itself.

Early in our research of the most ergonomically efficient dental methods, we realized that belly bars are not necessary. In fact, they simply get in the way. With proper positioning of materials and supplies, Assistants are able to maintain a sound ergonomic posture that provides better comfort and improved productivity.
Instrument & Supply Storage
Accessories
Save time. Improve reliability.

In contrast to trays, Cassettes only need to be set up once; post-procedure, the cassette is processed as a complete, sealed unit. Eliminating the breakdown/setup cycle in this manner saves an enormous amount of time and effort associated with every procedure.

Cassettes also remove a critical margin of error, because instruments are never removed from the cassette outside the operatory – and an instrument is assigned to every slot. This allows the practitioner to determine, at a glance, if something is missing.

High flow-through design & stainless steel construction with full width hinges make these units both efficient and durable.

### Thompson 5 Cassette (item M2G1)

**Exam, Ortho, Pedo-hygiene & Quick-Check Cassette**

This setup covers preliminary exam and diagnostic instruments.

**Configuration:** 5 instrument slots, plus side compartment

**Dimensions:** 8” x 3-3/16” x 1-1/8” (closed)

**Typical Setup:** Mirror, Explorer, Scaler, Perio Probe, Composite Instrument, and A/W Syringe Tip

### 9 Instrument Cassette (item M2B2)

**Hygiene Cassette**

This cassette is the only unit you need for any hygiene procedure (Prophy, Perio, etc). Don’t complicate matters by over-specializing – always think consolidation.

**Configuration:** 9 instrument slots, plus side compartment

**Dimensions:** 8” x 6” x 1-3/16” (closed)

**Typical Setup:** Mirror, Explorer, Perio Probe, Posterior Explorer, Anterior Sickle, Gracey 1/2, Universal 5/6, Gracey 11/12, Gracey 13/14, and A/W Syringe Tip

*All instruments are shown for display purposes only and are not included in Cassettes purchase.

### Surgical Cassette (item M2E1)

Ideal for large, bulky surgical instruments. Surgeries also tend to happen less frequently in most practices - making them great candidates for a “set it and forget it” cassette.

**Configuration:** 6 instrument slots plus 2 compartments and separator

**Dimensions:** 10” x 5-1/2” x 4” (closed)

**Typical Restorative Setup:**

- Side Compartment - Anesthetic Syringe, Articulating Paper Holder, 2 Matrix Band Holders, A/W Syringe Tip, Hemostat, 12-Hook Scalpel, 2 Cotton Forceps
- Cubed Container - Air Abrasion Tip

### 14 Instrument Cassette (item M2C1)

**Restorative/Operative/Crown & Bridge Cassette**

This unit is your bread and butter cassette and is used for all restorative dentistry.

**Configuration:** 14 instrument slots plus side compartment

**Dimensions:** 8” x 10-7/8” x 1-3/16” (closed)

**Typical Restorative Setup:**

- Side Compartment - Anesthetic Syringe, Articulating Paper Holder, 2 Matrix Band Holders, A/W Syringe Tip, Hemostat, 12-Hook Scalpel, 2 Cotton Forceps
- Cubed Container - Air Abrasion Tip

*All Instruments are shown for display purposes only and are not included in Cassettes purchase.
MegaTub™ & UltraTub™ (Items M1B1 & M1C1)

Consolidate up to 10 days worth of your most common procedures materials – at your fingertips – with these customizable in-op storage utilities.

Standard Features - MegaTub
- 2 Long plastic dividers
- 1 Long aluminum divider
- 6 Short plastic dividers
- 5 Utility compartment boxes
  - 3 four-compartment boxes
  - 2 six-compartment boxes
- 1 Aluminum composite rack
- Composite rack grommets to be inserted based on your particular needs (two interior hole sizes)
- Clear plastic lid
- Aluminum wall/shelf bracket

Standard Features - UltraTub

### Finish Selections

Selecting an EP cabinet color early is very important as all the colors and materials throughout the office need to be coordinated as the interior design process moves forward.

**Treatment Rooms:** Panolam or StevensWood laminates will be used for all head wall cabinetry, and the insides of InWall Work Stations and InWall Comfort Stations (with sinks) in both Hygiene and Doctor rooms.

**Lab & Sterilization:** Most clients opt for custom laminated cabinets for their sterilization areas, which will coordinate nicely with the colors shown below. For inventory cabinetry, our clients typically use the EP 32” Resupply Pulldown.

**EP RapidCarts**®: RapidCarts® are also made with Panolam or StevensWood and may be upgraded to include Corian Tops.

### CORIAN Colors

<table>
<thead>
<tr>

- **Custom Grey**
- **Glacier White**

### Corresponding Face Frame Paint on Woodgrain Cabinets

- **Grey Echo**
- **Dark Noce**
- **Giorgio Notte**
- **6116 Tatami Tan**
- **7048 Urbana Bronze**
- **7510 Chateau Brown**
- **7028 Functional Grey**
- **Arizona Cypress**

### Face Frame Options: Painted or Primed (to be painted on-site)

If choosing to leave face frames primed only, purchaser is responsible for all finish-painting.

*Upgrade charge applies to all cabinets, InWalls or RapidCarts where a woodgrain finish is selected as an option.*

---

### Testimonials

**Your equipment and theory has changed my practice in unbelievable ways. We have almost doubled production in the last 3 years thanks to our new office full of EP equipment and theory.**

— Dr. Jay Wisner
Charleston, SC

**The set ups saved me at least $25,000 per operatory, but I like the equipment more for the fact that it’s easy to use and it makes me more efficient.**

— Dr. Kaveh Ghaboussi
Madison, MI

**The E/P philosophy included the concept of central inventory and the sterilization flow, which made so much sense to me... IT IS BETTER and it is less expensive than all the “traditional” dental op stuff. After purchasing it, I am very impressed with the stability and engineering of the Workstations.**

— Dr. Doug Halloran
Fresno, CA

**Patients are impressed upon first entering the reception area and treatment room areas. Although the treatment rooms are actually smaller then my other office, the patients comment that they feel larger!**

— Dr. Charles Miller
Golden, CO

**I was surprised at your solution to more efficient delivery; it is far more advanced than the way we deliver. Giving the assistants every item at their disposal is great.**

— Dr. Richard DeForno
Thorndale, PA
